Valerie Lively, a computer scientist with the Transportation Security Administration (TSA) Research and Development Laboratory specializes in technologies applicable to biometrics, access control, and information systems security.

Mrs. Lively is currently the Biometrics and Credential Technology Specialist for Biometrics and Access Control R&D. Prior to joining TSA, Mrs. Lively worked for the Federal Aviation Administration (FAA) as a Systems and Security engineer. During her time at the FAA she worked on a various information technology projects including network intrusion detection, firewall management, PKI, and systems security test and evaluation.

Mrs. Lively received a B.S. degree in Computer Science from Central State University in 1994 and a M.S. in Software Engineering from Monmouth University in 1999, and is a member of IEEE Computer Society.
