In his role as head of Research and Development for the Biocom Group, Wayne Kyle is responsible for leading a talented team of software and hardware engineers in the development of BioMAP, Biocom's leading Multi-Vendor, Multi-Biometrics Operating Platform.

In his Business Development role, Mr. Kyle is responsible for developing and maintaining client and partner relations in the United States and abroad. In this role, he works with many of the world's largest systems integrators and is responsible for designing and delivering fully integrated biometrics systems to governmental and commercial clients. Mr. Kyle also works with many of the world's leading biometrics companies to ensure that their products that have been integrated into the BioMAP Operating Platform are properly marketed and that the technology is always kept updated.

Mr. Kyle has over 10 years experience in traditional Security technology and Biometrics, as well as in Satellite, RF and Data communications and Video Imaging systems. He is an accomplished public speaker and regularly presents at technology and biometrics expositions and conferences. Mr. Kyle is also the Biocom representative to the INCITS M1 committee and several of his white papers have been published in leading biometrics publications and reports. He is the inventor of a number of Patents relating to the biometrics and security fields.

Mr. Kyle is a co-founder of Biocom L.L.C.
