Shirley Ann Stern has 22 years experience in the system software development industry. She started her software career at Digital Equipment Corporation, holding a series of product management and marketing roles specializing in computer languages and application development tools. For the past 10 years she has been employed by Oracle Corporation as a Principal Product Manager in Server Technology, the base development group for the Oracle database. She has handled a wide range of development projects including rich media support within the database and most recently, biometric support for the Oracle environment.

Ms. Stern has written several articles for software publications including several on Java language development. She has spoken at various industry symposia on a variety of application development topics and received several industry awards.

Ms. Stern received a Bachelor of Arts in History and English from Rutgers University and a Master of Business Arts from Rivier College. She has also taken several advanced business courses in financial management and information technology at Harvard University.
