

Biometric Consortium 2003 Conference

John Neumann

President
Open Strategies, Inc.

OpenStrat@aol.com

John Neumann, a 1967 graduate of the University of Minnesota, has held a number of different Software Development positions since then. As a part of his responsibilities for the development of proprietary network product offerings he became involved in National and International Standardization efforts in 1978. He has continued this involvement to this time, working in a number of disciplines including Network Architecture, Distributed Transaction Processing, Magnetic Tape, Optical Storage, and Biometrics.

Mr. Neumann is the current Chairman of ECMA TC31 responsible for DVD standardization, as well as editor for the Biometric Profile for Transportation Workers (Employees). He is President of Open Strategies, Inc., a consulting firm specializing in standardization issues in a variety of technologies.
