Rod Beatson has been involved with the development and commercialization of electronic signature verification and capture systems for over twenty years. He is the President of Transaction Security, which he founded to provide a vehicle for Consulting activities and for the development of his patent-pending Crypto-Sign technology. He pioneered the development of early signature verification systems in the 1980's, and in the 1990's, he introduced electronic signature capture to the retail industry where there are now hundreds of thousands of signature devices capturing billions of electronic signatures annually.

Mr. Beatson has testified on Capitol Hill and served as an expert witness on the subject of electronic signatures and has authored patents in the area.

He received his Bachelor of Science degree in Mathematical Statistics from the University of Liverpool in the UK and moved with his wife and family to the US in 1986. He has three grown children and three grandchildren.
