Udo Mahlmeister received his MSE in electrical engineering and cybernetics from the Technical University of Munich, Germany, in 1991.

He held research positions at the GSF Medical Research Center, Neuherberg, Germany, at the University of Kiel, Germany, where he worked on attentive compression of face images, and at Philips Medical Systems, Hamburg, Germany, where he developed ranging, segmentation and image compression algorithms for digital chest X-ray systems.

Mr. Mahlmeister is currently a Senior Algorithms Engineer at Iridian Technologies, NJ, where he is leading the research on countermeasures for iris recognition.

His major research interests are pattern classification, signal processing, and image compression.
