David Tunnell is Vice President of Government Solutions at Genex Technologies, a high-technology imaging company focused on 3D and 360° intelligent surveillance solutions. Mr. Tunnell has over 18 years of experience in developing high-technology solutions for the US Government and commercial industry. He has served as a federal employee with 13 years of service at the National Security Agency (NSA) and tours with various other agencies serving in field operations, support, and SIGINT solutions development. During his NSA career, he has held a variety of program & engineering management positions.

Mr. Tunnell joins Genex from L3 Communications, Inc., where he served as Director of Engineering, overseeing RF, Digital, and Systems Engineering at an L3 subsidiary. While at L3 Communications, he served as the primary interface with customers, bridging the gap between customer requirements, system design, and engineering. He also managed technical personnel, budgets, schedules, and technical direction for the development of high-speed, real-time SIGINT processing solutions and various demodulation/decoding algorithms.

Mr. Tunnell earned a Masters in Technical Management from Johns Hopkins University (1997) and a BSEE from the University of Tennessee (1988). He received a Bachelor of Science in Electrical Engineering from the University of Tennessee and a Master of Science in Technical Management from the Johns Hopkins University. He is married and has 5 children, including a pair of beautiful twins.
