Dr. Joseph Campbell is currently a Senior Member of the Technical Staff at MIT Lincoln Laboratory in the Information Systems Technology Group, where he conducts speech-processing research and specializes in advanced speaker recognition methods.

Before joining Lincoln Laboratory, Dr. Campbell served 22 years at the National Security Agency (NSA). From 1991 to 1998, Dr. Campbell was a senior scientist in NSA's Biometric Technology research group, where he led voice verification research. From 1994 to 1998, he chaired the Biometric Consortium, the US Government's focal point for research, development, test, evaluation, and application of biometric-based personal identification and verification technology. From 1998 to 2001, he led the Acoustics Section of NSA's Speech Research branch conducting and coordinating research on and evaluation of speaker recognition, language identification, gender identification, and speech activity detection methods. From 1991 to 1999, Dr. Campbell was an Associate Editor of the IEEE Transactions on Speech and Audio Processing. He was an IEEE Signal Processing Society Distinguished Lecturer in 2001. From 1991 to 2001, he taught Speech Processing at The Johns Hopkins University.

Dr. Campbell received his B.S. degree in electrical engineering from Rensselaer Polytechnic Institute in 1979, M.S. degree in electrical engineering from The Johns Hopkins University in 1986, and Ph.D. degree in electrical engineering from Oklahoma State University in 1992.
