Dr. Bojan Cukic is an associate professor of Computer Science and Engineering at West Virginia University. He joined WVU in 1997.

His research interests include software engineering for high assurance systems, fault tolerant computing, information assurance and biometrics. The themes of his biometrics research are feasibility assessment and reliability evaluation of large-scale biometric applications, as well as the design, test, and evaluation of multimodal biometrics.

Dr. Cukic is the author of over 60 peer-reviewed publications and the recipient of a National Science Foundation CAREER award. He also leads graduate level biometrics and information assurance curriculum development efforts at WVU.

Dr. Cukic serves as a co-director of CITeR, Center for Identification Technology Research. CITeR is the first National Science Foundation Industry/University Cooperative Research Center focusing on Biometric Identification Technology. He also currently serves as the co-chair of the Program Committee for the 14<sup>th</sup> IEEE International Symposium on Software Reliability Engineering, to be held in Denver, CO, November 2003.

Dr. Cukic received a Bachelor of Science in Computer Engineering from the University of Ljubljana, Slovenia, and MS and PhD degrees in Computer Science from the University of Houston, TX.
