paul.griffin@identix.com

Prior to his role as Chief Technology Officer for Identix, Dr. Paul Griffin served the same function for Visionics Corporation, which he co-founded with Dr. Joseph Atick, Identix CEO and President. Today, Dr. Griffin is responsible for overseeing the technical development of all product lines as well as the integration of the technologies into products, systems, and platforms into deliverables that will best serve market demands.

Prior to joining Visionics, Dr. Griffin worked at the Computational Neuroscience Laboratory for the Rockefeller University as a research associate and had held doctoral fellowships at the Fermi National Accelerator Laboratory in Illinois and at the University of Florida as a Superconducting Supercollider (SSC) fellow, focusing on computational methods in particle physics.

Dr. Griffin earned his B.A. in Physics in 1983 from the University of California at Berkeley as the top undergraduate physics student, and subsequently earned his Ph.D. in theoretical physics from Stanford University in 1988.

Dr. Griffin has published over 25 original papers in the fields of mathematical physics, computational physics, and pattern recognition.
