Dr. Craig Arndt is currently Director of Biometric Programs at Mitretek Systems in Washington DC, a leading government think tank. Dr. Arndt is a recognized world leader in biometric technology and provides advice and consulting to the top levels of the US government. Prior to coming to Mitretek Systems, Dr. Arndt was chief scientist at the DoD Biometric Fusion Center.

Dr. Arndt holds four engineering degrees including a BS in electrical engineering from Ohio State University, Master degrees in Human Factors Engineering and Systems Engineering from Wright State University, and a Doctoral degree in Electrical Engineering from the University of Dayton. Dr. Arndt has completed leadership and executive management, and is working on a Master's degree in National Security and Strategic Studies from the Navy War College. Dr. Arndt is a registered Professional Engineer in the State of Ohio and a Certified Human Factors Professional. He also holds DoD Acquisition Professional certifications in developmental engineering and program management.

Dr. Arndt is a member of the adjunct faculty of West Virginia University, San Jose State University and the Florida Institute of Technology. Dr. Arndt has published articles in the fields of Human Computer Interface (HCI), Biometrics, Signal Processing and Artificial Intelligence (AI). Dr. Arndt is a sought after speaker and a review and advisor to the NSF and other national and international technical organizations. Dr. Arndt is married to Ms. Dorothy Becker and has two children Danny and Randy.
