Mira LaCous manages and directs the product development and advancement at BIO-key International. She has guided the advancement of the BIO-key technologies to include trusted and secure architectures, groundbreaking discrimination and accuracy, as well as source device independence and interoperability.

Ms. LaCous has over 15 years of experience in software development and over 5 years of experience in company leadership. She has completed a Bachelor's in Computer Science from the North Dakota State University as well as all but Dissertation towards a Master's Degree. She has brought many successful projects to market including automated voice response systems, building control systems, software piracy protection, intranet training materials and testing, page layout and design software, scanning software and systems, and more.

Ms. LaCous has been an officer or director of three companies including National Computer Systems (NCS), TEL-Line Systems, and BIO-key International (formerly SAC Technologies, Inc.). Ms. LaCous has led and managed software development teams and invented advanced architectures most of her career. She has worked at the source level for almost 10 years, in addition to leading the teams. Ms. LaCous has consistently helped to lead companies and teams to more profits and successful product launches.
