

Constructing Privacy Policy: Principles and Frameworks

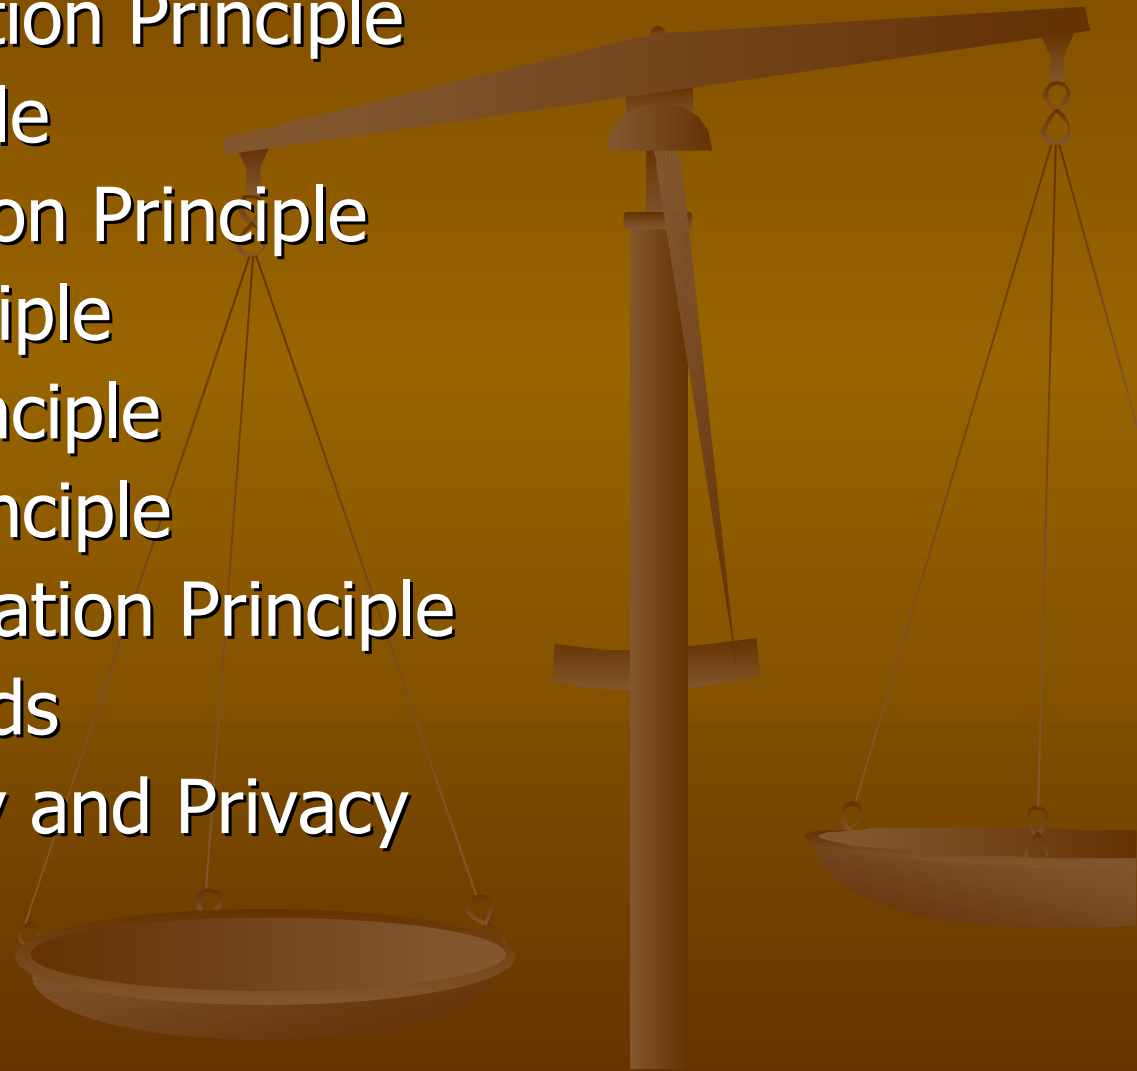

Lisa S. Nelson J.D. Ph.D.

Protecting Privacy: Models, Principles and Frameworks

- Considering Biometric Privacy Identifier Acts
 - Code of Fair Information Practices
 - Organization of Economic Cooperation and Development Principles
 - Health Information Portability and Accountability Act (HIPAA)
 - Gramm-Leach Bliley (GBL)
- 

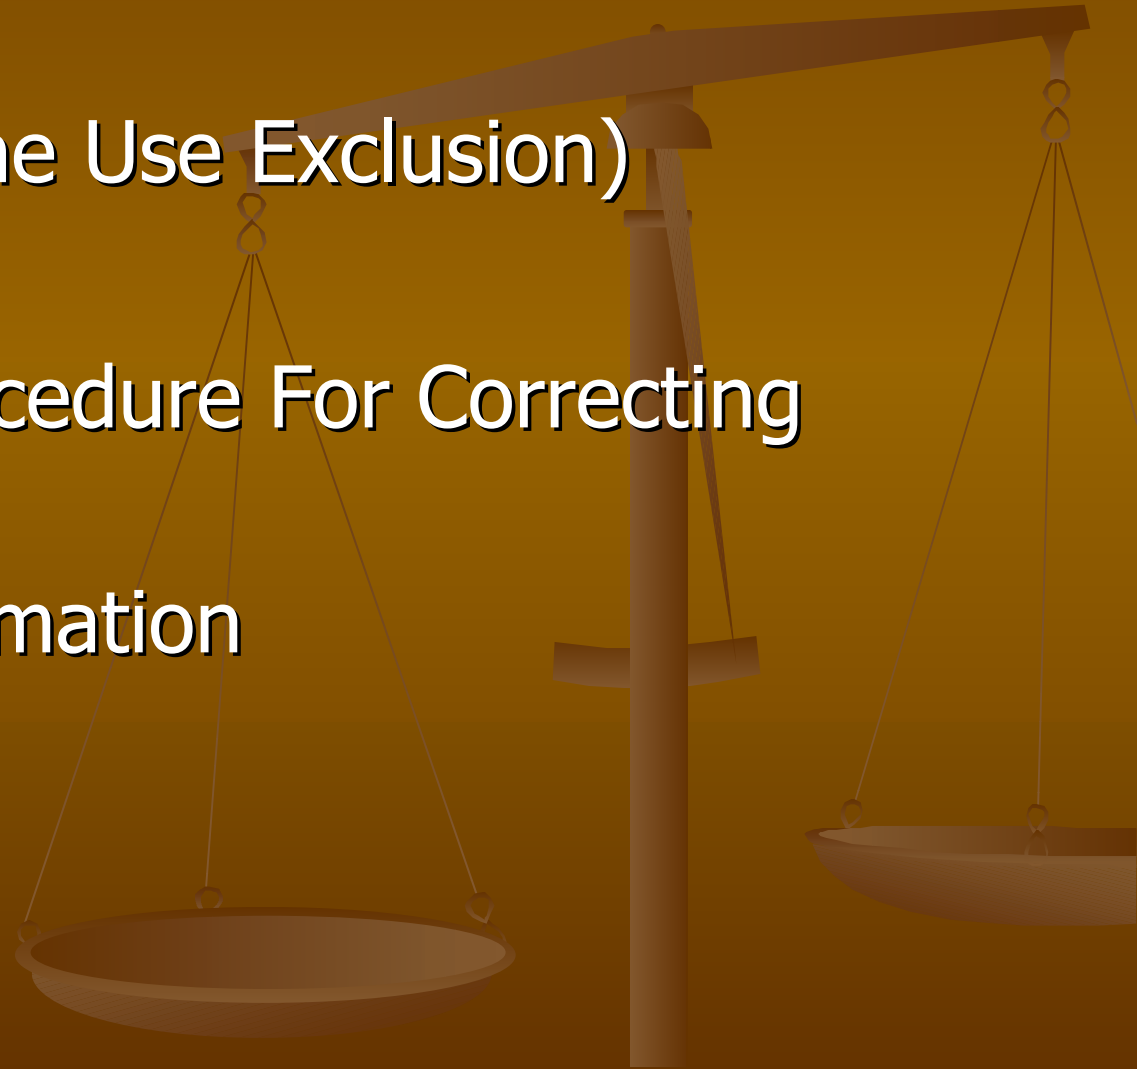

OECD: Guiding Principles

- Purpose Specification Principle
- Openness Principle
- Collection Limitation Principle
- Data Quality Principle
- Accountability Principle
- Use Limitation Principle
- Individual Participation Principle
- Security Safeguards
- Balancing Security and Privacy

The Privacy Act of 1974

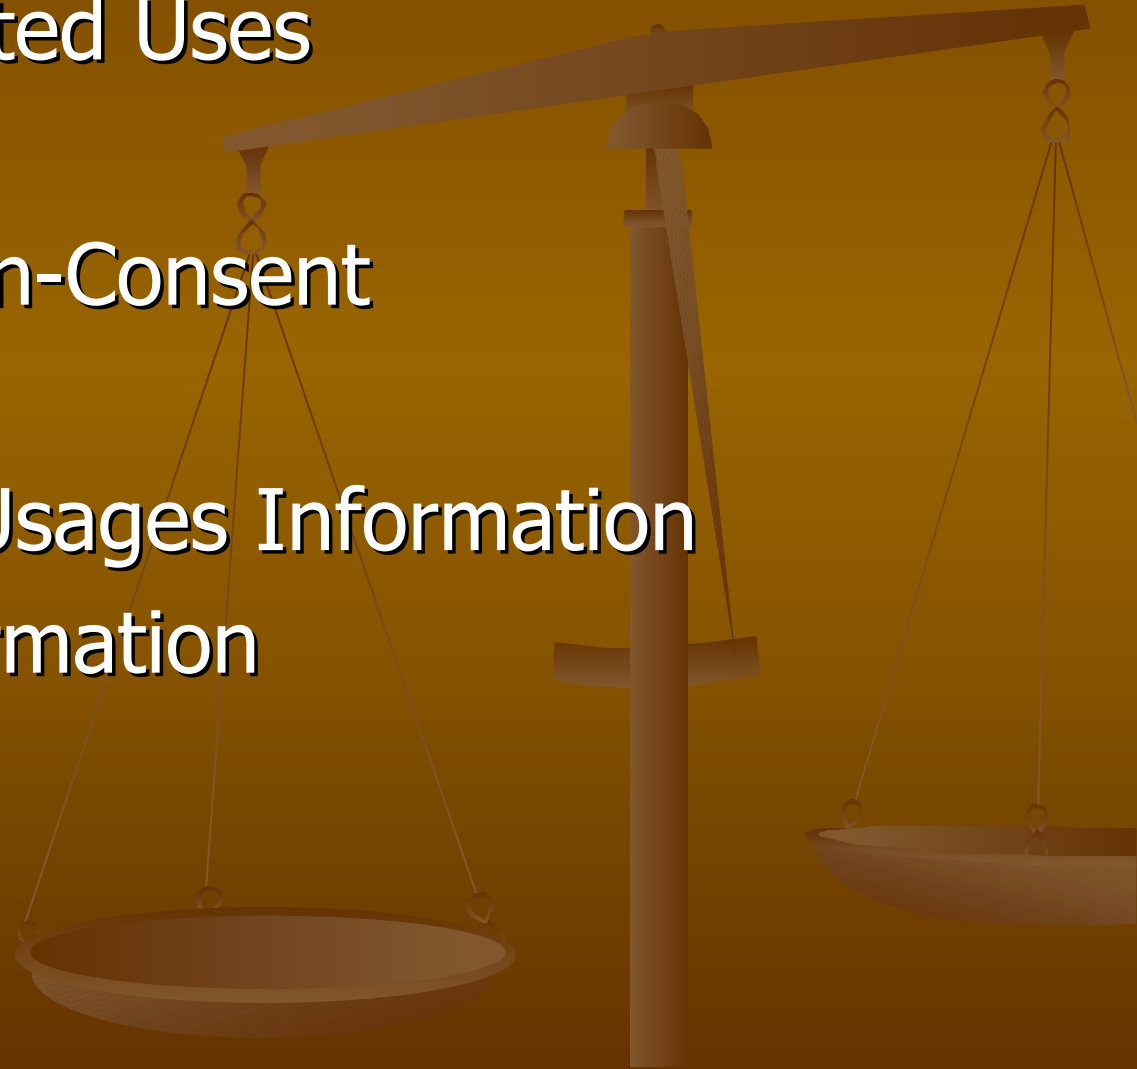

- Application
- Consent (Routine Use Exclusion)
- Notice
- Reasonable Procedure For Correcting Information
- Review of Information

Comparing Privacy Policies

HIPAA

- Defining Permitted Uses
- Consent
- Instances of non-Consent
- Notice
- Limitations on Usages Information
- Sharing of Information
- Security Rule

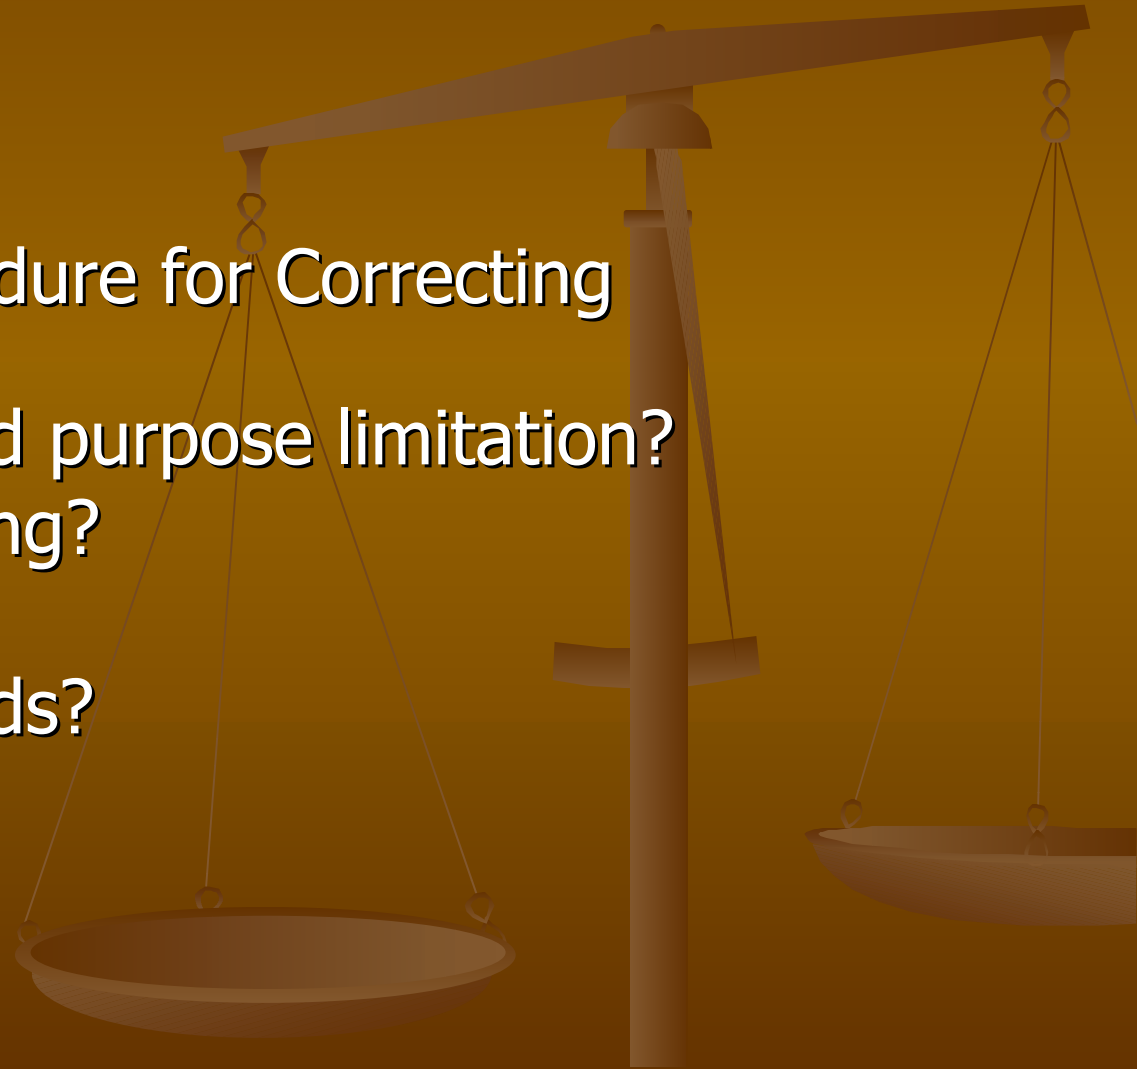

Gramm-Leach Bliley

- Consent
- Notice: opt-out
- Sharing of Information: Affiliates
- Security

The Biometrics Identifier Privacy Act: a point of comparison

- Consent?
- Exemptions?
- Notice?
- Reasonable Procedure for Correcting Information?
- Use, collection and purpose limitation?
- Information Sharing?
- Data quality?
- Security Safeguards?
- Accountability?

Too Narrow, Too Broad

- Modification of consent to allow exemptions
 - The prerequisites of consent: Knowing, limits, uses, disclosure
 - Notice Requirements
 - Information Sharing Policy
 - Technological, Administrative, Physical Safeguards
 - Transparency and Accountability
-
