Topic: DoD Biometrics and HSPD-12

Abstract: Homeland Security Presidential Directive (HSPD) #12 mandates a new Personal Identity Verification (PIV) standard for an interoperable federal identity credential. DoD Biometrics is working with the DoD's identity management community to meet the new standard. This presentation will provide an overview of DoD Biometrics role and our efforts to support the Department's identity management community in complying with HSPD-12.

Biography: Mr. Min Chong is a Senior Manager with Research Associates, providing program management support to the Department of Defense (DoD) Biometrics Management Office (BMO). He focuses on all biometric matters relating to smart cards and Public Key Infrastructure (PKI) as it relates to the identity protection and management framework. Prior to his work on the CAC-Biometrics project, Mr. Chong was a consultant in BearingPoint Inc.'s (formerly KPMG Consulting) public sector practice. He served on the Army Chief Information Officer's (CIO) Smart Card implementation program as the Public Key Infrastructure (PKI) team lead.

Mr. Chong graduated from the United States Military Academy at West Point with a Bachelor of Science degree in Systems Engineering. He also earned a Master of Arts degree in Economics with a concentration in managerial economics from the University of Oklahoma.
