Topic: Iris Recognition Research Interagency Coordination Plan (ICP)

Abstract:

Biography: Valerie Lively, an Computer Scientist with the US Department of Homeland Security, Transportation Security Administration (TSA) Research and Development (R&D) Laboratory for three years, specializes in technologies applicable to airport physical security, biometrics, access control, credentials and information systems security. She has over 12 years experience in the aviation industry within the federal government.

Mrs. Lively is currently the Biometrics and Credentials Technologist for Biometrics and Access Control R&D. Prior to joining TSA, Mrs. Lively worked for the Federal Aviation Administration (FAA) as a Systems and Security engineer. During her time at the FAA she worked on a various information technology projects including systems test and evaluation, network intrusion detection, firewall management, and PKI.

Mrs. Lively received a B.S. degree in Computer Science from Central State University in 1994 and a M.S. in Software Engineering from Monmouth University in 1999, and is a member of IEEE Computer Society.
