Topic: Iris Image Quality Assessment

Biography:

Nathan Kalka is a Graduate Research Assistant for Dr. Natalia Schmid at West Virginia University. Mr. Kalka holds a BS in Computer Science from WVU and is currently finishing his MS in Computer Science. His research interests include biometrics, cryptography, data mining, pattern recognition, biomedical imaging, and image processing.

During the past summer Mr. Kalka worked as an intern for Lockheed Martin Information Technology, where he conducted research concerning image quality assessment for fingerprint and iris biometric. Mr. Kalka was also involved analyzing different fusion methods for fingerprint, face, and iris biometrics.
